OUR VISION

We envision a university in Ga'anda ward, a standard GSM network, access road, a bigger printing press. Additionally, access to good healthcare, peaceful coexistence between farmers and herdsmen, peace and unity, modern market, electricity power supply, general hospital, portable drinking water, law, and abiding citizens. We envision Ga'anda ward developing into a Local Government and our district head to become a first-class chief.

MESSAGE FROM THE COUNCILLOR

My name is Honourable Polycarp Jadiel (Councillor representing Ga'anda ward, Gombi LGA). I was born and brought up in Ga'anda ward and I am glad to participate in the first Community Development Planning (CDP) session of Ga'anda ward.

Ga'anda ward is facing challenges of insecurity, lack of basic amenities, poor access road and lack of modern farming equipment. This Community Development Plan (CDP), developed through a bottom-top approach, will serve as a key document for the development and improvement in service delivery and a better future for the next generation of Ga'anda ward.

The knowledge we gained from the CDP session has enlightened us more about our weaknesses and strengths in the ward.

My vision for Ga'anda ward is to become a development area with sufficient basic amenities, good access roads and adequate security. I hope government at all levels (Federal, State and Local Government), development partners and concerned individuals utilise this plan for the development of Ga'anda ward. I would like to thank GIZ and Murmushi Peoples Development Foundation (MPDF) for their inclusive facilitation of the CDP session.

MESSAGE FROM THE DISTRICT HEAD

My name is Mallam Mahmud Ahmed Shuaibu (Jarman Adamawa). I am the District Head of Ga'anda, Boga/Dingai and Gabun ward. The three wards under my leadership are largely populated by Ga'anda, Hona, Fulani, Michika tribes who live in peace with each other.

As a district head, sometimes my people find it difficult to come close to me to discuss their problems because of fear and difference in hierarchy. For the first time in Ga'anda ward, the CDP session brought together all categories of people in the community to discuss their common problems and proffer solutions. This process has bridged that gap and barrier between my people and myself and as they became freer to discuss openly with me as the session progressed.

The Community Development Planning (CDP) process, particularly the CDP session and the nature of the facilitation impressed me a lot. The people of Ga'anda now understand that we are all stakeholders of Ga'anda ward. I am overwhelmed with the way people from different communities came together and shared ideas even though the villages are far apart from each other.

I hope the present and future generations will value the love and unity in Ga'anda and be law-abiding citizens. My profound gratitude goes to GIZ and Murmushi Peoples Development Foundation (MPDF) for their immense contribution and selfless sacrifice towards the development of our ward.

ABOUT THIS PLAN

Gombi LGA is one of the seven Local Government Areas of Adamawa state that suffered the Boko Haram menace in 2014. Apart from the destruction of physical infrastructures such as schools, water points and health centres in the local government, people were killed and displaced, and many fled to safety. The physical and psychological trauma of the Boko Haram menace required concerted efforts for the victims' full recovery.

Against this background, the local government, and the traditional leaders of Gombi LGA have put the reconstruction and long-term development needs of the local population as their priority with the support of the GIZ programme "Support to Strengthening Resilience in North-East Nigeria" (funded by the European Union and the German Federal Ministry of Economic Cooperation and Development). They have started the Community Development Planning (CDP) process, which aims at bringing together various community actors, vulnerable groups, women and men of different ages and socio-economic backgrounds at ward level to plan for the development of their communities through a participatory bottom-up planning process.

The CDP process has provided the opportunity for the community stakeholders to come together under one umbrella to discuss and analyse their livelihoods, including problems, causes, strategies and potentials that could help in solving them. It is a capacity building process where members of a community are active participants in their problem identification, analysis of developmental issues affecting them and brainstorming on solutions to solve the problems while putting the peculiarity of their communities in the centre of all the efforts.

While stakeholder sensitisation, ward analysis and community mobilisation played a crucial role in the CDP process, the Community Development Planning Session itself was the heart of the process. This 4-day session is akin to the village/town meetings where members of the community come together to discuss issues that affect their development and plan activities to overcome those development gaps. The major objectives of the CDP session are:

- To provide an opportunity for different socio-economic groups to discuss and analyse their livelihoods, including problems, causes, strategies and potentials within the community

that could help them solve these problems

- To build people's capacity to participate more actively in development issues affecting them as individuals and their community as a whole
- To create a platform, where the people can discuss with their political and traditional leaders
- To identify and prioritise the needs of the community

Participants of the CDP session were carefully selected cutting across all demographics and socio-economic groups within the ward including vulnerable groups such as IDP, persons living with disability and orphaned children.

The CDP process in Gombi LGA was facilitated by the Governance Component of GIZ's Resilience Programme and their Civil Society Organization (CSO) partners: Goggoji Zummuchi Development Initiative (GZDI), Murmushi Peoples Development Foundation (MPDF) Budgeting and Planning Departments of the Gombi LGA, Adamawa State Planning Commission and Ministry of Local Government Affairs. The CDP processes were supported and guided by the local government and traditional leadership

The tangible results of the Ga'anda CDP process and especially the CDP session is this Ward Development Plan. Representatives of Ga'anda ward validated the CDP Plan and its content.

EXECUTIVE SUMMARY: KEY FINDINGS AND RECOMMENDATIONS

The Community Development Planning session (CDP) for Ga'anda ward took place from 14-17 June 2021 at Ga'anda primary school with two streams (A&B) activity taking place concurrently in adherence to covid-19 protocols. Different categories of people from Ga'anda ward comprising of traditional, religious and political leaders, men and women from different age groups, social actors, economic actors, vulnerable groups such as persons with disabilities and IDPs came together to plan for the development of our ward.

Ga'anda ward is one among the ten wards of Gombi LGA with different tribes living together, majority of which are Ga'anda, Hona, Fulani and Michika. Our people are predominantly farmers while a substantial number are engaged in various kinds of trades. Our ward borders with Garkida and Guyaku ward to the North, Singire to the South, Tawa to the East and Boga/Dinga to the west.

Our ward is blessed with natural, economic, and social resources such as hills, stones provision shops, market primary and secondary schools. The CDP process provided us with the opportunity to come together to discuss and analyse our livelihoods, problems, and potential solutions and to create a joint development

plan for a better future for our communities. During the CDP session, we collectively defined Development as a process where people unite for a better living.

In our ward, we consider everyone a stakeholder in its development; we especially believe that the political leaders, religious leaders, traders, farmers, and economic actors have a special role to play in our community development. Political, traditional, and religious leaders, as well as elders, were the stakeholders identified.

Our shared values in the ward are respect for elders, hospitality, respect to one another, hardworking, proper upbringing, peace and unity, farming, respect for culture and tradition, respect for the political and traditional leader, assisting elders, assisting one another and hospitality.

We envision that Ga'anda ward in the next 10 years will have a university, good access roads and a bigger printing press. Additionally, access to good healthcare, peaceful coexistence between farmers and herdsmen, peace and unity, modern market, essential electricity power supply, general hospital, portable drinking water, law, and abiding citizens.

A MIXED GROUP DELIBERATES DURING A GROUP WORK EXERCISE

A CROSS - SECTION OF PARTICIPANTS ENGAGE IN VARIOUS GROUP WORKS

Our vision is to see Ga'anda ward develop into a Local Government and our district head be upgraded to a first-class Chief.

Major development challenges in our ward are lack of access to good health, insufficient security personnel, inadequate modern farming implements, inadequate portable water, insufficient qualified teachers, insufficient electricity power supply and cases of drug abuse. Among the problems we identified and clustered, our voting shows the priorities of our people is health, water and sanitation, and education.

For sustainability of the project and the future development of our ward, we selected 24 persons (12 men and 12 women) among us of different ages and from different villages under Ga'anda ward as our Ward Project Supervisory Committee (WPSC).

GA'ANDA WARD AT A GLANCE

- In Ga'anda ward, we have one district head, one ward head together with 19 village heads. We have 19 communities under Ga'anda ward namely, Banga, Ga'anda, Dadwari, Gangrang, Gudban, Kojoli, Kanjira, Urdum, Hina, Palara, Kwanta, Prakwanta, Ganjara, Hurkwurta, Julabarni, Jemjeba, Kampamta, Tumbur and Sangere.
- We have different ethnic groups and languages,

but the major ones are Ga'anda, Hona, Fulani and Michika.

- The majority of our people practice Christianity, while some practice Islam and others are traditionalists.
- Major market days in our ward are Tuesdays, Thursdays, and Thursdays

THIS IS OUR WARD

GEOGRAPHIC INFORMATION

Ga'anda ward is one of the 10 wards in Gombi LGA of Adamawa State. It is situated between coordinates 10° 9' 44" N and 12° 44' 24" E. The area is characterized by the typical rainy and dry seasons. The dry season is for a period of 5 months (November to March), while the rainy season is from April to October each year. The annual rainfall ranges from 700 -1,050 mm. The temperature in the area remains high in most parts of the year being as hot as 39°C between March and June. It is cold only between December and January with temperatures ranging from 27°C and 32°C.

The topography is highly rugged and generally undulating; covered by scattered chains of rocky hills at an average elevation of 520 meters above mean sea level. The elevation of the land surface generally increases northwards. Ga'anda ward falls within the Sudan savannah belt of Nigeria and the vegetation zone is referred to as cambretaceous woodland savannah. About 70% of the vegetation are grasses and weeds with few scattered woody plants. However, the natural vegetation has been altered by human activities such as cutting trees for fuel, settlement expansion, farming activities, bush burning and rearing of animals.

DEMOGRAPHICS: POPULATION

Ga'anda ward is one among the 10 wards of Gombi LGA with different tribes living together, majority of which are Ga'anda, Hona, Fulani and Michika. Our people are predominantly farmers while a substantial number engage in various kinds of trades. Our ward borders with Garkida and Guyaku ward to the North, Singire to the South, Tawa to the East and Boga/Dinga to the west.

Our people were also affected by the Boko Haram insurgency, which resulted in the displacement of our people to other communities for safety. However, most of our people are now living in their homes and those who left have returned. Ga'anda as a host community has the least number of IDPs. We also have people living with disability. There are people of different ethnic groups living together in our ward. Majority of our people speak Ga'anda, Fulfulde and

Hona. Christianity and Islam are the dominant religion of our people with a little traditionalist.

SUMMARY OF THE SOCIO-ECONOMIC SITUATION

In Ga'anda ward, we practice agriculture as the major source of income. The main agricultural produce of our area is Bambara nut, beans, groundnut, guinea corn, maize and rice. Farming is a seasonal occupation mainly done during the rainy season. During the dry season, we engage ourselves in so many businesses to earn a living.

The following jobs are dominated by men in our community; animal rearing, black market (petrol selling), block making, barbing, carpentry, cell phone selling, chemist, clock repairing, conductor, driving, engineering, fishing, mat making, mechanic work, tailoring. While our women typically engage in businesses like selling of Ankara, weaving, groundnut oil extraction, fish trading, cutting, and selling of firewood, charcoal selling, calabash making, cake making, beads making.

Most communities in our ward have a specific market day where people from different areas come together to buy and sell their farm produce. Tuesdays, Thursdays, and Sundays are the major market days in our ward. There is insufficient access to jobs in our ward, and the major reasons are corruption-related issues, jobs are of bad quality and no access to capital. Most of us are low-income earners with very small capital. We only buy and sell in small quantities. Due to this, we make as little as 5000 to 10,000 Naira monthly.

OUR VALUES

Our shared values are respect for elders, respect for culture and tradition, respect for political and traditional leaders assisting elders, assisting one another, hospitality, respect for one another, hard work, peace and unity.

THIS IS HOW WE MONITOR

The ward project supervisory committee was formed during the Ga'anda ward CDP session. The selection was based on gender, socio-ethnic groups and villages. Participants were grouped according to their villages and they were tasked to discuss and select from among themselves their respective representatives for the follow-up committee. The selected community members were then inaugurated in the plenary. The selected representatives would work voluntarily for the development of Ga'anda ward as there are no salaries or stipends attached to their roles and responsibilities. This committee composition contains at least 45% women and a fair representation of all stakeholders. The selection also considered equity, effectiveness, efficiency, legitimacy, and sustainability. A Follow-up committee comprising 24 representatives from each of the 19 villages within the ward was established. Functions of the Ward Project Supervisory Committee (WPSC) includes:

- The committee will provide support to their wards and avail themselves to their communities whenever necessary.
- The committee will meet with government agencies & development partners to discuss further modalities on the development within the ward.
- To report back to their respective community on the progress or otherwise of project activities and update the community on the issues discussed at the various meetings held with development partners.
